Notes:

- 1) Karpus Investment Management is a SEC registered investment adviser, founded in 1986. As of October 1, 2020, it is wholly-owned subsidiary of City of London Investment Group PLC. It provides balanced, equity, fixed income and cash management for retail and institutional clients.
- 2) The Equity Composite includes all institutional and retail portfolios invested in pre-dominantly large cap U.S. equities, international equities, and alternative investments from a well-diversified strategy.
- 3) Total Assets and Total Firm Assets are as of 12/31/2011-12/31/2020 annually. Rate of return figures are for periods ending on 12/31/2011-12/31/2020 annually.
- 4) Valuations and returns are computed and stated in U.S. dollars.
- 5) Rate of return figures reflect the reinvestment of all dividends, interest and other income.
- 6) Composite total return figures are annualized (geometrically linked) monthly time-weighted returns.
- 7) Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire calendar year.
- 8) Performance results are net of actual management fees and transaction costs. Figures are also net of custodial fees for accounts custodied at U.S. Bank. Such accounts currently comprise approximately 76% of the assets under management for the firm. Clients directing the use of other (“outside”) custodians are responsible for custody fees and pay them either directly from the account or separately. For these portfolios, the stated returns are gross of custodial fees.
- 9) The annual management fee schedule is as follows: 1.50% on the first \$1 million of market value, 1.30% on the next \$1 million, 1.20% on the next \$3 million, 1.10% on the next \$5 million, 1.00% on the next \$15 million, and 0.90% on the balance over \$25 million.
- 10) This composite was created on January 1, 1993.
- 11) Benchmark returns are calculated with a blend of 65% of the Morningstar Average Domestic Stock Fund and 35% of the Morningstar Average International Stock Fund, with monthly-rebalanced returns. The process of linking monthly returns has the effect of removing the survivorship bias from Morningstar’s monthly performance data. The Morningstar Average Domestic Stock Fund is the weighted average of all funds in categories classified as Domestic Stock by Morningstar. These include US Fund Large Value, US Fund Large Blend, US Fund Large Growth, US Fund Mid-Cap Value, US Fund Mid-Cap Blend, US Fund Mid-Cap Growth, US Fund Small Value, US Fund Small Blend, and US Fund Small Growth. The Morningstar Average International Stock Fund is the weighted average of all funds in categories classified as International Stock by Morningstar. These include US Fund Europe Stock, US Fund Latin America Stock, US Fund China Region, US Fund Diversified Emerging Mkts, US Fund Diversified Pacific/Asia, US Fund Pacific/Asia ex-Japan Stk, US Fund Japan Stock, US Fund Foreign Large Value, US Fund Foreign Large Blend, US Fund Foreign Large Growth, US Fund Foreign Small/Mid Blend, US Fund Foreign Small/Mid Value, US Fund Foreign Small/Mid Growth, US Fund World Large Stock, and US Fund World Allocation.
- 12) Effective 1/31/2012, KIM decided to change the method of pricing auction rate preferred securities due to the historical price ranges at which substantially similar securities were traded and valued. KIM now prices individual auction rate preferred securities based on the last known transaction price of all series of auction rate preferred securities of the specific fund in which KIM acted as a party to the transaction. At the end of each quarter, Karpus will review the pricing of ARPs which have not traded for the preceding 6 months to ensure that the prices represent fair value. If Karpus determines that the price does not reflect fair value, we will look for the most recent transaction price of the most comparable security. This change in methodology was implemented with the purpose of providing more current fair market values for these securities, and caused an immaterial impact to composite performance.
- 13) Commencing January 1, 2011, sub-portfolios are used and each segment is accounted for as if it were a separate portfolio including its own separate cash balance. Balanced and Equity portfolios must meet the minimum account size of \$100,000 in order to have their equity sub-portfolio included in this composite. The inclusions of these assets contribute to the increase in assets for this composite in 2011.
- 14) Significant cash flows are defined as a client-directed external cash flow that temporarily prevents the firm from implementing the composite strategy; the firm has set this at 20% of the market value of an account and started January 1, 2010. Portfolios with significant cash flows are excluded from the composite during the quarter of that cash flow.
- 15) New portfolios must be fully invested for three full months prior to being eligible for inclusion in this composite.
- 16) Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

A complete list and description of all of the firm’s composites is available upon request.
